

Dear Students,

According to the COVID-19 Regulations of TU Graz (<https://www.tugraz.at/icoe/coronavirus/home/>) the first lab can take place in presence as planned. However, due to the current situation, you can also do the first lab online instead:

- **If you want to do the lab in presence, register for one of the Groups in the TeachCenter until 30.11.2021.**
- **If you want to do the lab online instead, please contact marijan.palmisano@tugraz.at until 29.11.2021. Please DO NOT register for one of the Groups in the TeachCenter in this case.**

The following rules and safety measures apply when participating in the lab in presence:

- It is necessary to provide “evidence of a low epidemiological risk (2,5-G)” as described at <https://www.tugraz.at/icoe/coronavirus/home/> before entering the lab.
- At most two groups two students and one supervisor will be present in the lab at the same time.
- Each group works on a separate lab setup. A minimum distance of 2 meters between the groups is maintained at all time.
- It is mandatory to wear a protective mask in the entire building and during the lab class.
- We will provide protective gloves in the lab.
- The workplaces will be disinfected and the room will be ventilated after each group.
- The building might be locked because of the current situation. You will be able to enter the building 5 minutes before the exercise starts. If you are late and the doors are locked, please call +43 316 873 7019 (telephone in the lab).
- Please bring your preparation as well as a pen and an USB memory stick. Your preparation should be compatible with Matlab 2018a; export your Simulink files to version 2018a if you use a newer version.

Please confirm that you have read and understood above rules in the TeachCenter. If you have any questions, please contact marijan.palmisano@tugraz.at.

Best regards,

Marijan Palmisano
